Keewatin-Aski Ltd. has extensive experience in arena facility planning and design. Arena facilities play an important role in enhancing the quality of life through physical activity. In addition, arenas provide numerous community benefits including employment opportunities, space for community events and economic prospects. Our firm has worked closely with numerous communities to plan and design arena facilities. The positive socioeconomic benefits of arena facilities are well documented and the experience of our firm has provided an invaluable resource for achieving these benefits.

Our firm has provided engineering and architectural services for the following arena projects:
